Note: The following work roles exist in DoD 8140 V2.1 but have no published certification options (pending DoD review): (462) Control Systems Security Specialist, (731) Cyber Legal Advisor, (901) Executive Cyber Leader.

DoD 8140 Cybersecurity Workforce Qualification — Personal Certification Path

Governed by DoDM 8140.03 "Cyberspace Workforce Qualification and Management Program" (15 Feb 2023) — https://dodcio.defense.gov/Portals/0/Documents/Library/DoDM-8140-03.pdf. This matrix is compiled from the DoD 8140 Foundational Qualification Matrix V2.1 (effective 19 Sep 2025), published at https://www.cyber.mil/dod-workforce-innovation-directorate/dod8140/qualification-matrices.

Work roles: every IT and cyber-related DoD position is mapped to one or more "work roles" — about 70 roles grouped into 7 workforce elements (Cybersecurity, IT, Cyber Enablers, Cyber Effects, Intelligence, Software Engineering, Data/AI). A single individual may hold up to 3 work roles; qualification is evaluated per role. See the DCWF at https://www.cyber.mil/dod-workforce-innovation-directorate/dod-cyber-workforce-framework. Each role has three proficiency levels (Basic, Intermediate, Advanced) — a higher-level qualification also satisfies lower levels within the same role.

Qualification paths: 8140 qualification can be met via one of four "Foundational Qualification" paths — Education, DoD/Military Training, Commercial Training, or Personnel Certification — plus an "Experience" alternative for eligible personnel. This matrix shows only the Personnel Certification path, which may be the most practical route for anyone without an applicable degree or military schooling.

Education path: Bachelor's, Master's, or PhD in Information Technology, Cybersecurity, Data Science, Information Systems, Computer Science, or Software Engineering from an ABET-accredited (abet.org) or CAE-designated (caecommunity.org) institution. Bachelor's satisfies Basic and Intermediate levels; Master's or PhD satisfies all three levels, including Advanced (a V2.1 change — previously TBD at Advanced). Degree must be within the last 5 years with documented continuous cyberspace work since. See the "8140 Interim Education Qualification Options" reference cited throughout the DoD matrix workbook for additional considerations.

DoD / Military Training path: specific military schoolhouse courses listed per work role in the DoD 8140 Training Repository (within the same workbook linked above). Generally not accessible to government civilians or contractors unless previously completed during military service. Exception: CY 101 (40-hour online course) satisfies qualification for all Cyber Enabler work roles — https://www.cyber.mil/training/cyber-101.

Commercial Training path: commercial courses approved as 8140 qualification options. Thin option universe; most entries overlap with certifications.

Experience (alternative): available only to government civilians and military personnel. Contractors are NOT eligible for the Experience path.
